About This Content

This BlastZone 2 model pack includes VeryHigh detail terrain for the Homeworld, Alien World, and Cave environments. These models have 10x the triangle count of the standard terrain included in the game, bringing it to about 650k triangles per block of terrain. This vastly increases the minimum requirements and disk space needed to run the game with them applied.

Once downloaded, these models are applied to the game by starting up the Configuration Application and selecting "VeryHigh" for the "Terrain Detail" setting. This option cannot be changed in game.
